

ArteZanos® Unique & Innovative Roofing Products

THE HYBRID UNIVERSAL ROOF TILE SYSTEM:

Introducing A Revolutionary New Roofing System

THE HYBRID UNIVERSAL ROOF TILE SYSTEM, is a new green and environmentally friendly hybrid roof tile system designed as a traditional barrel tile system with increased performance, incredible benefits and upgrade options.

ArteZanos® Hybrid Universal Roof Tile System: Traditional Handmade Barrel Tile & The Universal Pan

We have created a patented Miami-Dade County Approved disaster resistant, 100 year, recyclable, panelized, easy-to-install traditional roof tile system that can support aesthetically integrated photovoltaic and green roofing technologies.

The Universal Hybrid Roof Tile System with integrated photovoltaics.

The Advantages:

1. Class "A" Fire Rated
2. Hurricane & Disaster Resistant
3. Light Weight & Simple to Install
4. Energy Efficient
5. Long Life Cycle
6. Recycled & Recyclable
7. Compatibility & Design Flexibility
8. Retrofit Over Asphalt Shingles

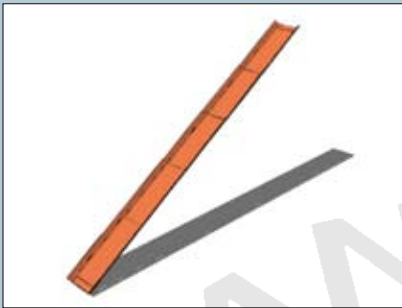

Optional Upgrade Options:

1. Solar Panel/ Photovoltaic Integration
2. Green Roofing & Horticulture
3. Polystyrene Foam Blocking
4. Antique Restored Handmade Barrel Tile.

ArteZanos® Hybrid Universal Roof Tile System: The Components

The Universal Pan

The Universal Pan is the key element of the universal hybrid roof tile system. It is made of 60% recycled aluminum, and since it replaces what traditionally used to be a clay tile, we have the added benefits of over 50% weight reduction, 191 lbs. uplift resistance and a facilitated installation that dramatically reduces the installation and transportation costs. The Universal Pan can be used with any barrel tile, from anywhere in the World.

ArteZanos® Handmade Barrel Tile

The breathtaking Tuscan beauty of ArteZanos® Barrel tile is reflected on each property it adorns. The many colors achieved through firing in our authentic beehive kilns allows nature to create our Terra-Cotta blends. These tiles can be creatively installed in a manner reminiscent of Old World traditions. Double perimeter eaves, varying headlaps and oozy mud work create your crown jewel.

Italiano Clay Pan Starter

The clay starter tile is used in combination with the The Universal Pan, it is the tile that starts the run of the underpan, and ensures the look of a true Roman pan system with the added benefits of the Hybrid Universal Roof Tile System

Horticulture & Prevegetated Mats

Topping the roof with vegetation has a myriad of ecological benefits. Our roof design integrates timeless terra-cotta roof tiles with a stimulating visual array of horticulture creations nestled in between. Barrel roof tile and sinuous roof tile patterns often accrue organic material in the roof tile troughs giving rise to un-welcome plant life. At ArteZanos® we have dedicated our systems to sustain plant life and welcome Mother Nature as an integral part of our design.

Solar Panel/Photovoltaics

We are using the latest in thin film technologies encapsulated in a protective housing to ensure its longevity and to protect from the elements. We are currently working with several solar manufacturers to introduce the highest quality panels to integrate into our system.

ArteZanos® Hybrid Universal Roof Tile System: How It Works & How We Compare

The Hybrid Universal Roof Tile System is simple and easy-to-install. We use existing and proven installation techniques that are similar to the installation of a traditional barrel tile roof, with the added benefits of a longer lasting, more economical installation with highly improved attachment resistance.

Comparison:	ArteZanos® Hybrid Roof Tile System	Traditional Barrel Tile	Concrete Tile	Asphalt Shingles	Clay S-Tile
Class A Fire Rated	✓	✓	✓		✓
Best Attachment Resistance	✓				
Economical Installation	✓			✓	✓
Long Lifespan	✓	✓			
Energy Efficient	✓	✓			✓
Easy to Maintain	✓	✓			
Recycled/Recyclable	✓	✓
